StockEvent Lens — Batch 005 Intelligence Dashboard

Articles 021–025 Analysis, Vector Embedding Sensitivity & Conflict Thresholds

Batch ID
`batch_05 (Articles 021-025)`

TEST 021
Original 100% Base
Huawei unveils 10+ AI chips, targeting Ascend 960 DT launch in Q1 2027[cite: 40].

TEST 022
Repeat 96% Overlap
Re-syndicated wire report on Huawei's new chipset lineup with zero new facts[cite: 41].

TEST 023
Update +23% New Info
Opens partner evaluation program and remote testing access for Ascend 960[cite: 42].

TEST 024
Conflict Dispute (Q2)
Contradicts official launch timeline: claims presentation specified Q2 2027[cite: 43].

TEST 025
Different 0% Overlap
Unrelated Nvidia European Developer Relations appointment starting Group 010[cite: 44].

Technical Analysis: Dense Vector Blindness vs. Temporal Contradiction Metrics

A core challenge in automated financial news aggregation is that dense vector models (e.g., BAAI/bge-small-en-v1.5, OpenAI Ada-002) compute cosine similarity based on *semantic context* rather than *temporal or release-date fidelity*. Changing quarters (e.g., Q1 2027 vs Q2 2027 schedule in test_024) yields high vector similarity (~0.90) because both texts share identical surrounding context tokens ("Ascend 960 DT", "Huawei Connect", "launch", "2027").

```
// Formula: Formal Conflict Detection Condition
Conflict_State = ( Cosine_Similarity(E_orig, E_cand) > τ_sim ) && ( ΔF_contradiction == 1.0 )
where τ_sim = 0.60, and ΔF_contradiction = 1.0 indicates a hard temporal or launch quarter dispute.
```

1. Dense Embedding Blindness
Dense embeddings project words into high-dimensional space where "Q1 2027" and "Q2 2027" share near-identical context embeddings. Thus, pure vector cosine distance fails to flag this schedule conflict.

2. LLM Evaluation Override
To prevent missing critical product roadmap disputes, the LLM reasoning layer performs explicit temporal attribute-value matching, overriding high vector similarity when $\Delta F_{contradiction} = 1.0$ is detected.

Article Relationship & Percentage Breakdown (Batch 005)

FILE IDENTIFIER	PATTERN LABEL	KEYWORDS IDENTIFIED	SIMILARITY %	DELTA %	CLASSIFICATION RATIONALE
`test_021_original`	Original (%5=1)	Huawei AI chips, Ascend 960 DT, Q1 2027 launch, David Wang, Huawei Connect[cite: 40]	100%	Baseline	Establishes breaking news frame on Huawei's 10+ new AI chipsets and Ascend 960 roadmap[cite: 45].
`test_022_repeat`	Repeat (%5=2)	Huawei chipset unveiling, Ascend 960 DT, Q1 2027 schedule, David Wang[cite: 41]	96%	0% New Facts	Rephrased wire report detailing identical chip specs and timelines without new developments[cite: 45].
`test_023_update`	Update (%5=3)	**Partner evaluation program**, remote testing access, technical documentation[cite: 42]	84%	+23% Operational Facts	Advances event state by launching partner evaluation program and remote chip testing[cite: 45].
`test_024_conflict`	Conflict (%5=4)	**Q2 2027 launch dispute**, presentation schedule contest, competing account[cite: 43]	89% Match	$\Delta F_{contradiction}$ = 1.0	Directly disputes initial Q1 2027 launch window, asserting presentation specified Q2 2027[cite: 45].
`test_025_different`	Different (%5=0)	Nvidia European DevRel appointment, October 1 effective date, regional support[cite: 44]	0%	Group 010 Trigger	Zero domain overlap; triggers standalone Group 010 event cluster[cite: 45].

Group 009 — Consolidated Event Summary

4 Articles (021–024)

At Huawei Connect in Shanghai, Huawei unveiled over 10 new AI infrastructure chipsets, including the next-generation Ascend 960 DT accelerator featuring twice the performance of its predecessor, alongside the Ascend 960PR slated for Q3 2027 (Articles 021–022)[cite: 45]. Following the unveiling, Huawei opened partner applications for an evaluation program providing technical documentation and remote testing access (Article 023)[cite: 45]. However, the official Ascend 960 DT launch schedule is disputed: original reporting stated the chip is scheduled for Q1 2027, whereas a competing account claims the presentation specified a launch in Q2 2027 (Article 024 ; $\Delta F_{contradiction}$ = 1.0)[cite: 45]. Analysts note that despite Huawei's domestic push, NVIDIA retains a substantial technological lead in China[cite: 45].

Group 010 — Standalone Summary

1 Article (025)

NVIDIA has appointed a new head of European developer relations, effective October 1[cite: 45]. The incoming leader will oversee regional developer support, training initiatives, community programs, and local workshop schedules across Europe (Article 025).
