StockEvent Lens — Batch 021 Intelligence Dashboard

Articles 101–105 Analysis, Vector Embedding Sensitivity & Conflict Thresholds

Batch ID
`batch_21 (Articles 101-105)`

TEST 101
Original — 100% Base
Nebius plans ~20% GPU cloud price hike from Oct 1; B300 rises ~21% to $9.50/hr[cite: 15, 18].

TEST 102
Repeat — 96% Overlap
Restates Nebius 20% Oct 1 GPU rate schedule and market reaction without new facts[cite: 15, 19].

TEST 103
Update — +25% New Info
Nebius confirms price hikes, adds CPU/memory hikes, discounts, and $1B+ contracts[cite: 15, 20].

TEST 104
Conflict — Dispute ($10.50)
Contradicts B300 pricing: claims B300 hourly rate jumps 34% to $10.50/hr from $7.85[cite: 15, 21].

TEST 105
Different — 0% Overlap
CoreWeave $40M/MW capacity deals and $25B+ commitments starting Group 042[cite: 15, 17].

Technical Analysis: Dense Vector Blindness vs. Temporal Contradiction Metrics

A core challenge in automated financial news aggregation is that dense vector models (e.g., BAAI/bge-small-en-v1.5, OpenAI Ada-002) compute cosine similarity based on *semantic context* rather than *unit pricing precision*. Changing hourly rate points (e.g., $9.50/hr [+21%] in test_101 vs $10.50/hr [+34%] in test_104 for Nvidia B300 chips) yields high vector similarity (~0.91) because both texts share identical surrounding context tokens ("Nebius", "B300", "Oct. 1", "GPU cloud", "$7.85").

```
// Formula: Formal Conflict Detection Condition
Conflict_State = ( Cosine_Similarity(E_orig, E_cand) > τ_sim ) && ( ΔF_contradiction == 1.0 )
where τ_sim = 0.60, and ΔF_contradiction = 1.0 indicates a hard numerical price-point or percentage increase dispute.
```

1. Dense Embedding Blindness
Dense embeddings project words into high-dimensional space where "$9.50 per hour" and "$10.50 per hour" share near-identical context embeddings. Thus, pure vector cosine distance fails to flag this price conflict.

2. LLM Evaluation Override
To prevent corrupting financial yield models, the LLM reasoning layer performs explicit attribute-value price verification, overriding high vector similarity when $\Delta F_{contradiction} = 1.0$ is detected.

Article Relationship & Percentage Breakdown (Batch 021)

FILE IDENTIFIER	PATTERN LABEL	KEYWORDS IDENTIFIED	SIMILARITY %	DELTA %	CLASSIFICATION RATIONALE
`test_101_original`	Original (%5=1)	Nebius GPU cloud, Oct 1 price hike, H100 $4.50, B200 $8.50, B300 $9.50[cite: 15, 18]	100%	Baseline	Establishes breaking story frame on Nebius' reported 20% GPU price hike from Oct 1[cite: 15, 18].
`test_102_repeat`	Repeat (%5=2)	Nebius GPU cloud, Oct 1 rates, H100 $4.50, H200 $5.40, B300 $9.50[cite: 15, 19]	96%	0% New Facts	Restates identical rate schedule, pricing hikes, and market reaction without new developments[cite: 15, 19].
`test_103_update`	Update (%5=3)	**Official confirmation**, AMD/Intel CPU hikes +25%, memory +41%, $1B+ contracts[cite: 15, 20]	82%	+25% Operational Facts	Advances event state via official company confirmation, CPU/memory price hikes, commitment discounts, and four $1B+ contract wins[cite: 15, 20].
`test_104_conflict`	Conflict (%5=4)	**B300 $10.50 dispute**, 34% jump claim, 72% pre-May increase contest[cite: 15, 21]	91% Match	$\Delta F_{contradiction} = 1.0$	Directly disputes initial B300 rate, asserting the price climbs 34% to $10.50/hr instead of 21% to $9.50/hr[cite: 15, 21].
`test_105_different`	Different (%5=0)	CoreWeave $40M/MW contracts, $25B net commitments, 4.2 GW power capacity[cite: 15, 17]	0%	Group 042 Trigger	Zero domain overlap; triggers standalone Group 042 event cluster for CoreWeave capacity disclosures[cite: 15, 17].

Group 041 — Consolidated Event Summary

4 Articles (101–104)

Nebius Group N.V. is raising pay-as-you-go GPU cloud leasing prices by ~20% starting Oct 1, covering NVIDIA H100 ($4.50/hr), H200 ($5.40/hr), and B200 ($8.50/hr) chips (Articles 101–102)[cite: 15, 18, 19]. Service terms and product scope expanded as **Nebius officially confirmed the price hikes, expanded on-demand rate increases to AMD/Intel CPUs (up to 25%) and memory (up to 41%), and announced multi-month cluster commitment discounts alongside four $1B+ customer contract wins** (Article 103)[cite: 15, 20]. However, the Blackwell B300 pricing model is in direct conflict: original reports confirmed B300 rate rising ~21% to $9.50/hr from $7.85, whereas a contradictory report claims the **B300 hourly rate jumps 34% to $10.50/hr from $7.85** (Article 104 ; $\Delta F_{contradiction} = 1.0$)[cite: 15, 21].

✓ Update Preserved: Official Confirmation, CPU/Memory Hikes & $1B+ Contracts
✓ Conflict Preserved: B300 Rate $9.50/hr (+21%) vs $10.50/hr (+34%)
✓ Duplicate Removed: Article 102 Consolidated

Group 042 — Standalone Summary

1 Article (105)

CoreWeave announced signing short-dated compute contracts at ~$40M per megawatt , adding over $25 billion in net new customer commitments early in Q3 2026 and expanding total contracted power capacity to 4.2 GW (Article 105)[cite: 15, 17].

✓ New Event Cluster Established ✓ Zero Entity Contamination from Group 041
